OBJECTIVE

Pre-final year B.Tech Computer Science & Engineering (Data Science) student seeking an entry-level Data Analyst or Software/System Engineer role where I can apply Python, SQL, data pipelines and full-stack development skills. Hands-on experience building end-to-end projects: real-time streaming pipelines, analytics dashboards, REST APIs and LLM-based applications.

EDUCATION

B.Tech - Computer Science & Engineering (Data Science)
Gyan Ganga Institute of Technology & Sciences (GGITS), Jabalpur | RGPV | 2023 - 2027 | CGPA: 7.5
Relevant Coursework: DBMS, Data Structures & Algorithms, OOP, Machine Learning, Statistics

Class XII (CBSE, Maths/Science)
St. Joseph's Convent School, Jabalpur | 2022 - 2023 | CGPA: 6.9

Class X (CBSE)
St. Joseph's Convent School, Jabalpur | 2021 - 2022 | CGPA: 8.2

PROJECTS

Real-Time Orders Data Pipeline | GitHub | Kafka, Spark Structured Streaming, PostgreSQL, Streamlit, Docker, GitHub Actions

- Built an end-to-end streaming pipeline: Python producer to Kafka to Spark Structured Streaming to PostgreSQL to a live Streamlit dashboard (5-second refresh) with KPIs, revenue trends and category/city analytics.
- Implemented schema validation, data-quality filtering, watermark-based deduplication and checkpointing; modelled 5 SQL views for analytics.
- Optimized micro-batch latency from ~58 s to ~12 s by tuning shuffle partitions and removing duplicate recomputation.
- Containerized all 5 services with Docker Compose and set up GitHub Actions CI (lint, unit tests, image build).

Document Q&A Chatbot (RAG) | GitHub | FastAPI, LangChain, ChromaDB, Gemini API, Docker

- Built a Retrieval-Augmented Generation app: users upload PDF/text files, which are chunked, embedded and stored in ChromaDB; top-k retrieval grounds LLM answers with source file and page citations.
- Developed FastAPI REST endpoints (/upload, /ask, /documents, /health) and a web chat interface; LLM provider is configurable (Gemini, Claude, Ollama).
- Containerized with Docker and added GitHub Actions CI with API tests.

TrackPaper - Document Custody & Integrity Verification | GitHub | Python, SHA-256 | Team Lead | SIH 2026 Top 10

- Led a 5-member team (Paper Sentinels) to a Top 10 rank out of 150+ teams at the GGITS Smart India Hackathon (SIH 2026) Internal Round.
- Engineered a document verification prototype using Python and SHA-256 cryptographic hashing to detect tampering and guarantee audit integrity.
- Structured sprint milestones, coordinated team integration, and presented technical demonstrations to evaluation panels.

AI Interview Preparation System | GitHub | Flask, PostgreSQL, SQLAlchemy, TF-IDF, Docker

- Built an AI-powered mock interview platform with role-based questions and intelligent scoring feedback.
- Implemented NLP-based answer evaluation using TF-IDF and LLM (Gemini API) for personalized feedback.
- Developed and deployed REST APIs using Docker with PostgreSQL database.
- Integrated secure user authentication, session management, and performance history tracking.

CampusIQ - Student Academic Analytics System | GitHub | Flask, MongoDB, JavaScript, Appwrite

- Built a full-stack student tracking system supporting CRUD operations, file uploads, and teacher management for 500+ student records.
- Secured REST API endpoints using JWT tokens and Appwrite OAuth2 authentication.
- Designed role-based responsive dashboards for students and teachers with real-time data visualization.

- Deployed on Vercel (frontend) and Railway (backend) with MongoDB Atlas; reduced manual reporting effort significantly.

Sales Analytics Dashboard | GitHub | Python, Snowflake, dbt, SQL, Streamlit

- Built an end-to-end sales analytics pipeline on a 9,800+ record retail dataset, from raw CSV to a live interactive dashboard.
- Cleaned and transformed data with Pandas, then loaded it into Snowflake as a cloud data warehouse.
- Designed a 3-layer dbt/SQL architecture (staging, intermediate, mart) using window functions for running revenue totals and segment-level aggregations.
- Built a Streamlit + Plotly dashboard with 5 interactive charts and secure credential management; deployed live on Streamlit Cloud.

WORK EXPERIENCE

Limitless Technologies LLP | Web Development & Technical Mentorship Intern | Nov 2025 - Feb 2026 | Remote

- Built responsive web interfaces and interactive utility applications using HTML5, CSS3, and JavaScript (Expense Tracker, Calculator, UI components).
- Transitioned to Technical Mentorship, reviewing frontend code submissions, assisting in debugging, and guiding 250+ students on project roadmaps.
- Monitored project evaluation milestones, code review feedback, and cohort attendance to ensure consistent learning outcomes.

TECHNICAL SKILLS

Languages: Python, SQL, C++

Data & Analytics: Pandas, Matplotlib, Plotly, Scikit-learn, NLP (TF-IDF), dbt, Apache Kafka, Spark Structured Streaming (PySpark)

AI / LLM: LangChain, RAG, ChromaDB (vector DB), Gemini API

Backend: Flask, FastAPI, REST API, JWT Authentication

Databases: PostgreSQL, MongoDB, Snowflake, Supabase

Tools & DevOps: Git, GitHub, GitHub Actions (CI), Docker, Docker Compose

Cloud & Deployment: Vercel, Railway, Render, Streamlit Cloud

Core CS: Data Structures & Algorithms, OOP, DBMS, SDLC, Agile Fundamentals

ACHIEVEMENTS

- Solved 200+ problems on LeetCode (Easy: 67, Medium: 93, Hard: 18) with 50 Days Badge 2026
- Smart India Hackathon (SIH 2026): Top 10 out of 150+ teams as Team Lead of Paper Sentinels at the GGITS Internal Round
- HackerRank 5-Star Gold Badges in Python and SQL
- Participated in FOSS Hack (open-source hackathon) and NASA Hackathon

STRENGTHS & HOBBIES

- **Problem Solving:** Consistent DSA practice with 200+ LeetCode problems solved and strong logical reasoning.
- **Mentoring & Leadership:** Guided 250+ students as a technical intern and led SIH hackathon team to Top 10.
- **Indian Classical Dance (Kathak):** Stage performer; fosters discipline, creative rhythm, and stage confidence.
- **Recreational Sports & Puzzles:** Enjoy badminton, sudoku, and logic puzzles for mental agility.
